Profile Summary

Aspiring Software Engineer with a strong foundation in Java, OOP, Data Structures and Algorithms, and SQL. Skilled in Spring Boot, REST APIs, Hibernate, Microservices, and Angular. Experienced in developing scalable applications, secure authentication, and database integration. Passionate about problem-solving and building efficient, reliable software solutions.

Professional Experience

Software Development Trainee, *Capgemini* 06/2026 – 10/2026
Completed technical training in Java, DSA, Spring Boot, Spring Security, and Microservices. Gained hands-on exposure to Docker, Kubernetes, Angular, and software development practices.

Full Stack Developer Intern, *CubeAI Tech Solutions* 03/2025 – 05/2025
Completed a 3-month internship program with 14 days of on-site training, gaining hands-on experience in HTML, CSS, JavaScript, and React.js.

Education

B. Tech Artificial Intelligence and Data Science, *Nandha Engineering College* 2022 – 2026
CGPA: 8.45/10 Erode

Technical Summary

Programming Languages
Java, Python, SQL

Frontend Development
HTML5, CSS3, JavaScript, TypeScript, Angular

Backend Development
Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, JDBC

Development Tools
Git, GitHub, Maven, Docker, Postman, Swagger, VS Code, Eclipse, MySQL

Projects

STAY VISTA – HOTEL MANAGEMENT SYSTEM
Developed a full-stack Hotel Management System using Java 21, Spring Boot, Microservices, Angular, and MySQL to manage guests, rooms, reservations, billing, and hotel operations. Implemented JWT-based authentication and role-based access control, integrating Eureka service discovery, centralized configuration, Spring Cloud Gateway, and REST APIs for microservice communication. Technologies Used: Java 21, Spring Boot, Microservices, Angular, MySQL, Docker

AI-DRIVEN IMAGE ANOMALY DETECTION FOR PUBLIC SAFETY
An unsupervised deep learning system that detects anomalies in surveillance images by learning normal patterns and identifying deviations. Technologies Used: Python, TensorFlow/Keras, CNN, Autoencoders

REAL-TIME INVENTORY MANAGEMENT FOR VISION AND MISSION
Built a real-time inventory tracking system using TensorFlow and Raspberry Pi, achieving 90%+ object detection accuracy and reducing manual tracking effort by 60%. Technologies Used: Python, TensorFlow, Raspberry Pi

Certifications and Participation

Infosys Springboard

- Blockchain
- AI Primer
- Data Science Foundation

Smart India Hackathon – Travel Management Portal

Techstars Startup Weekend – Business Model Pitch

Innovation Day & Ideathon Winner – AI-based Training System

Leadership & Achievements

Department Secretary, AI & DS 2025 – 2026
Coordinated departmental activities and facilitated communication between faculty and students.

Best Technical Support award 2024 – 2025
Recognized for technical support and coordination excellence.

Secretary, College Trekking Club 2023 – 2024
Organized 5+ events and contributed to a 40% increase in club participation.

Event Organizer 2023 – 2026
Successfully organized 5+ departmental events, demonstrating leadership, teamwork, and event management skills.
